

“As much as our customers care about their boats and cars, our work has to be perfect.”

*–Tommy Gardner
Auto Interiors and Tops
Raleigh, North Carolina*

“When we work on a job, we know that our customers have high expectations for the finished product. We use Softside because we can count on it, even in the most demanding marine environment. It stretches to handle demanding curves and corners flawlessly. Their colors are fantastic, with great choices for both boats and cars. The colors match, even if I have to order material from different lot numbers.

On any job, our labor costs are much higher than the cost of material; I can't afford to cut corners on material and have the job come back. And when your customers are inspecting every stitch, believe me, you don't want a second-rate vinyl. So I use Softside.”
